|                                  | <b>Unit</b> | <b>Assay</b> |
|----------------------------------|-------------|--------------|
| *Li <sub>2</sub> CO <sub>3</sub> | %           | >99.9        |
| Cl                               | ppm         | <45          |
| Na                               | ppm         | <50          |
| Ca                               | ppm         | <50          |
| Mg                               | ppm         | <15          |
| S                                | ppm         | < 100        |
| Fe                               | ppm         | < 5          |
| B                                | ppm         | < 5          |
| K                                | ppm         | < 20         |
| Pb                               | ppm         | <1           |
| Ni                               | ppm         | <5           |
| Cu                               | ppm         | <1           |
| **Al                             | ppm         | <8           |
| Cr                               | ppm         | <1           |
| Mn                               | ppm         | < 0.4        |

(\*Note: The Li<sub>2</sub>CO<sub>3</sub> grade is calculated by difference)

(\*\*Note: 8ppm is Al detection limit)
